Good puzzles. Fun.. I want to love this game, for its quirkiness and unique setting (something reminding me of 1980s / 90s children's shows, Where the Wild Things Are, and a Spongebob-ish universe...) but beyond Lovely Weather We're Having providing for a few laughs at its strange settings, funny character designs (the dog that follows you around in particular, with his goofy smile...) and some amusing dialog (including a character lamenting / loving being kicked in the face and asking you to do so again as it's the only thing he has in life, more or less..) the game does little to provide any direction where you are to go, which fits the game's somewhat nitrous oxide/innocuous feeling atmosphere, but doesn't make for a very engaging game experience overall.

This game's retail price of 7.99 is very high, once you realize that there isn't anything to the gameplay beyond wandering through the forests, fields, and neighborhoods and occassionally exchanging a few lines of dialog with one of a handful of NPCs. In the game's description it mentions the weather in the game reflecting your actual location, which I never saw much variety in, whether as a result of it being clear days here, having some kind of location service/recognition switched off (??) or just having not tried to "play" the game enough. All of that aside, as a feature, if that doesn't affect the gameplay beyond only an aesthetic change, I don't see it adding much value to the title overall, beyond a kind of cool visual 'app'/technology.

If the game at least made an effort to conveying some kind of narrative or sense of progression and wasn't quite so experimental / abstract of an experience (and had a lower price point in lieu of that..) then I might recommend it, but as-is, on sale, all-in-all it amounted to what I expected of it: Some funny / nice / weird settings, without much to do.

. There are at least 2 good reasons to buy this game.. top 10/10 vodki. Update: The AI has been updated, the game is a lot more intuitive now.

This game is an unforgiving RTS survival game with retro graphics.
You have to make sure all your basic resources are always available or the game is over.

Recommended

I want to endorse this game, I really do.

However until the AI of the survivors is updated and they stop starving with tons of chicken already slaughtered in the pen, I cannot recommend. It's just way to frustrating not to be able to do anything....

I might just be stupid though.. I loved playing this game when I was younger and I still do. Despite some bugs on the PC port, I recommend it.

If you're having troubles with the jumping portions, turn Vsync on. Yeah, the fps will decrease, but I'd rather be safe than sorry.. This review is late because I was looking everywhere for news on the release of more of Never Again! Simply put, I enjoyed this game immensely. From the Music to the fabulous voice overs, the perfectly timed jump scares to the fear of suffocating. This playthrough had it all for me. I have highly recommended it to my viewers and look forward to featuring more once it is released.

Hats off to one of my favourite Horrors this year!. Hi everyone! Its game is cool. Very very cool! Music is cool, gameplay too. I love Neon Space 2

it's fun, however it seems unfinished and unbalanced. Needs music,. I love this game. It's so much fun to play with friends. It could ruin relationships, depending on how competitive you get so approach with caution haha. It's hard to really play with random people though. Most likely because not enough people play it. Still fun nonetheless.. In my opinion its a really interesting and fun game to play, i enjoy the loot and fighting system. Although i havent finished it yet, it does deserve a thumbs up for being so fun!. Just purchase the 2nd game.. Its a fun puzzle game, even if it is based off another one of their games. Each puzzle depicting a scene from RADical ROACH and the OST being mostly the same as well. The pictures can be a bit tricky due to the darkish and post-apocalyptic imagery, but on average this is a must-buy for a pixel-puzzles fan.
